

REMARKS

The Notice to file Corrected Application Papers states that there appears to be six drawings represented, but five figures are listed in the brief description of the drawings. Applicant has remedied this issue in the attached substitute specification. Applicant has also attached a marked-up copy of the specification. Applicant respectfully disagrees that six drawings are represented in this application. Ten figures were originally filed with this application as noted on the Patent Application Information Retrieval (PAIR) system of the U.S. Patent and Trademark Office. However, only Figures 1-5 were described in the originally filed specification. Accordingly, Applicant has described Figures 6-10 in the description of the drawings section of the substitute specification to cure this error. It is noted that Applicant replaced Figures 1, 2, 3, 4, 5 and 10 in the response filed September 20, 2007. However, Applicant did not replace Figures 6, 7, 8 and 9, which were approved by the U.S. Patent and Trademark Office as formal drawings.

Favorable action on the merits is requested.

Respectfully submitted
for Applicant,
